

Dear Residents,

After the last few weeks I think everyone is ready for Spring or at least a break in the weather. In the mean time we must still deal with the snow. We are all running out of places to push it. I know the streets are narrowed and sometimes it is difficult to see near the intersections. We are working on it. We do ask that people don't push snow into the streets from your driveways and please, please do not push your snow into other people's yards.

In the office we are already planning for spring. We will be having our clean-up week May 13-18. Please set aside some time that week to help clean up around town and in your yard. We will have the city dump truck available to collect debris from the yards and around the house. On the 18th there may be a container to collect tires. That is still up in the air since it was somewhat abused last year. The city and the school will also be planting some trees and working on our parks. All volunteers are welcome. We will have more on this later.

Don't forget on the 10th of this month we begin daylight savings time. Remember spring forward, so we will lose that hour we gained last fall.

The City of Tetonia now has a book club open to everyone who likes to read. We have a small group now but we would like to see it grow. The next meeting will be April 3, at 7 pm at the City Hall. Please join us. For more information call the city office. This would be good way to meet all the new people in town and to visit with the neighbors you know.

Now that our water project is complete, we will begin working on the roads. Our budget is limited so this will be a much smaller project than the water project, but we do hope to get all the roads back in shape and make some improvements on a few of the troubled spots.

I hope everyone has noticed that we have new signs at the pedestrian crosswalks across Highway 33. These signs have flashers that will flash when pedestrians push the starter buttons. They will also be coordinated with the school so that they automatically flash during the times students are going to and coming from school. Please pay attention to the lights so we can keep our great safety record in town.

If you have any questions or comments for the city personnel or service please call the city office. Jacque will be glad to assist you and answer your questions. We also have an active facebook page and a web site that we hope you enjoy, but they are not the best way to have your questions answered or your problems solved.

Have a great month!

Respectfully,

Gloria Hoopes
