

Dear Citizens,

There are a few tips that could help our citizens and our city government be more prepared and safe during this coronavirus period.

1. Even though there is a toilet paper shortage we cannot have other products flushed down the toilets. Flushing paper towels and wet wipes and other items will clog our sewage system and cause greater problems.
2. Do as much city business as possible remotely. Most questions can be answered and problems solved by phone or e-mail. The city and county websites will also give current, confirmed information.
3. Bills can be paid online or through the dropbox at the city building.
4. Finally the city and county are working to keep everyone up to date with accurate, confirmed information. Social media is not a dependable source for information. Let's not spread rumors and misinformation that will cause confusion and extra worries.

Thank you,

Gloria Hoopes
